### BACK PAGE

## A day in the life of a social worker

Tina is a typical day in the life of a social welfare worker. On her desk there are three sheets of paper with work for her to do. She must visit the Kunz family in Bechstein. Their sixteen-yearold eon Klaus has been caught stealing from a large store for the third time and hae been handed over to the police.

When minors go shop-lifting the police call in social welfare workers. Family has to be checked. Usually there is something behind it when a young person breaks the law. Perhaps his parents' marriage is on the rocks end he has not been given sufficient love and attention.

Her second task for the day is a psychiatric consultation at the health, office which is carried put twice a year under the auapicea of a specialist from the University clinic and is invalueble for her as a social welfare worker embarking on

therapcu tic measures.

Her third "date" is for the afternoon.

Working with the local official doctor she will carry out tests on children starting school in five localities, including sight end hearing tests and a general health check up. In addition to this there will be studies of the children in the fourth and eighth school year. In the eighth year there will be primary consultations on future careers and a epecial report will have to be drawn up.

She is one of seven social welfare workers in a district where 88,000 persons live. In this district there is no division Into youth, health, and social

welfare but all ie included under the general heading "family welfare".

Although her profession has been given a somewhat more attractive styling in German this has not helped recruiting greatly and there ie still e lack of new blood for the social welfere officee of the future, particularly for work in tural

Most women eocial welfare workers who have to do practical work and six semesters at a epecial college for social welfare studies see the best opportunities for their profession in the big cities.

After the compulsory year of practical work under the direction of an cx-perienced member of their profession in a specialised ephere they turn themselves to a specialised aspect of social welfare work, for instance in juvenile courte or in marriage guidance.

In the district in which our subject works general family welfare le still carried out by the seven women workers, who are of the opinion that this method is more successful and promising than

Naturally they also had the opportunity of carrying out their work for society with an independent charitable organisation, in the welfare eection of a firm, in prisons or hospitals or in the career advice section of the employment office. Or they could have extended their studies within the ranks of the criminal investigation department of the police.

jack of all trades and their varied work takes them to varying places of work.
They drift from the health office to family homee, to schools and to kinder-

In the next few weeks two of them will be on duty awey from home. They will be accompanying children from their district visiting e spa on the North Sea and their work will be shared by the five who remain at home.

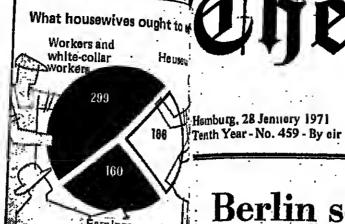

Some of the work they will leave behind is as follows: Mr K. from Burgholz will be taken at his family's request to a centre which cares for alcoholics. In a neighbouring village the M. family must be taken care of since the head of the family has been sent to prison for five

In another village twenty miles away a family must be persuaded to allow their foster civil who is suffering from mental dieorders to be taken to a clinic.

The neglected children of a teenage married couple in Langenhelm must be given care and attention and it is hoped thet their grandmother will take charge. The burgomaster of Bergen has reported that the children of the S. family aged between two and seven ere left alone ell day and heva to beg for their mid-day meal. Their mother must be perauaded to give up her job even through the family is in debt and support must be provided for

There are 750 wards who have to be visited regulerly. The living conditions of the E. family in Elbach must be investigated since they have agreed to look efter en old crippled woman.

The week efter next the social welfare team will be reduced in numbers again. At the psychosomatic clinic of the University courses are being held for further training of accial welfare workers. This is important since so far very few workere Instead they have decided to become a have been eble to help out in such casos

In the end, though — for the time being at least — East Berlin again brusquely rejects any manner of intre-German rap-

The unaccustomed observer is nothing Il not, confused, losing the thread in the iflurry of diplometic manoauvree. The heert of the matter is this: the Soviet

Union would like to see the Treaty with this country ratified es soon as Possible end realises that this can only be achieved in return for a treaty stetus for west Berlin.

In principle it is not edverse to so doing but it being kicked under the card table by its pariner, the GDR, whose trump card in gaining full diplometic recognition

eatlable desire for covereignty, the major liandicap in the wey of progress for the Bonn Federal government's new directions in policy towerds the Eastern Bloc.

It is surprising how little attantion has been paid to this factor. For a long time Herr Ulbricht had avery reason to believe that he would be able to achieve his heart's deaire, politicelly speaking, in return for a Berlin settiencut thet appeared acceptable to the West.

He was able to do eo not leest because in the final analysis the Federal government's policy amounted to precisely this last remaining bargain: a Berlin scttlement in return for recognition of the

In view of the Berlin proviso made by Bonn in connection with the Moscow Treaty and acknowledged in principle by the Soviet Union the GDR new runs the risk uf failing for the time being to reach its major political target.

It sucpects that recognition will not be such on urgent matter in this country once u Berlin settlement has been reached that is satisfactury as for as Bonn and the West are concerned.

Thie is why the GDR is playing such a tungh game et present and why Walter Ulbricht is duing his level best to get more than a font inside the Berlin dour. It may well be that East Berlin emissary

Michael Kohl'e surprise visit to Bonn on 15 January had this aim in mind. There cen certainly be no doubt that there will be no Berlin scttlement without the GDR -

### U.S. Senator in Bonn

Avareli Harriman, Foreign Ministar Waiter Scheel, Sanator Edmund Muskie and Chancelior Willy Brandt had talks on Ostpolitik in Bonn on 17 January. Sanator Muskia flew to Bonn from Moscow where he had bean on e fact-finding tour.

sualisee the situation, none without the Western Allies cities.

Bunn's poeition is not as bad ae the Oppositium Christian Democrets would like to make out. Bonn, refusing to ellow the others to make the running, has firmly rejected East Berlin's accusations.

In this country Bonn's more insistent approach hae been partly misunderstood as the possible beginning of e change of course by the government on Eestern

Yet enyone who consistently pursues a political course may find himself obliged energetically to defend it. This is all that and, regardless how Herr Ulbricht vi- the Federal government lies been doing.

Both Born and the Soviet Union are interested in seeing the Moscow Treety through the Bundeatag es econ as possible but this will only be possible provided the Kremlin egrees to an agreement on West

For the first time in 25 years there is a prospect of reaching n binding agreement on the security of Weat Berlin. This in itsolf ropresonta e new cra. In the circumstences Bonn would be ill-advised to change course now.

The Opposition's demand that ratifice-tien of the Moscow Treaty be made dependent on an improvement in intra-Germen relations would jeopardise the prospects of a Berlin settlement and the beginnings of detente in Europe that it

Welter Ulbricht will lieer nothing of the idea, as he plainly reiterated in a speech published on 14 January. Neither would the Russians, the Americans, the British and the French. No one wants to be involved in internecine German quarrels

in Berlin, on the other hand, the Western Allies are directly involved end their prestige is at staka. This is the only trump this country can still put to good

Hundreds of times though it mey have out that there are accrued ties and links between West Berlin and the Federal Republic.

This statua has become as much of a feality as the GDR has as a state. Both Moscow and the GDR will have to take this fect into account and act accordingly. As fer as thie aspact goes Bonn eennot yield another inch.

Egon Bahr will have told Michael Kohl this on 15 January and will reiterate it on

opjectivity;

The way in which the foreign policy debate has been exploited over the leet

Transfurler Rundbeham to Moscow as will show how seriously the countries concerned are interested in eafeguarding peace in Europe.

### **■ FOREIGN AFFAIRS**

## Detente in world affairs still seems a long way off

Detente would still seem to be the main catchward in world affairs at the moment. It is as though tacit agreement liad been reeched on this and the corresponding phrase in other languages ae the lowest common denominator of a large numbar and variety of foreign

The target is not so ambitious as cooperation, harmony or peace. Even coexlatence, ot one time an important item of political vacebulary, hes yialded to a word which at least implies that there is tension to stert with.

Relaxation of tension could mean a great deal, though, smoothing the path for something more specific and sub-stantiel. But is it still the appropriate

Possibly because of the gradual nature of the concept it can continue to be used even when the state of effairs in which it became predominant no longer quite exists, indeed, when the "de" in detente threatens to become the reverse.

Without the change having baen heralded by spectacular events the situetion as regards relaxation of tension has indeed takan a turn for the worse in comparison with the first half of last year.

in February 1970 President Nixon felt able to forecast, in e speech to Congress, that the seventies would be an ero of negotiatious and to announce a strategy

There were high hopes of the Salt talks, Fleet and Spain.

Dresident Pompidou voiced a note-

after-dinner apeech during the last full-acsle Franco-Federel Republic consulte-

Thia time, he said, there had been

something different about the talks.

Discussions had not only been cordial

(that they had been for years); "We have

dealt with the problems in hand both in

deteil and with the intention of going

common policy."

the Polish capital

opinion remained.

worthy sentiment in the course of an

which following the non-proliferation treaty that had just come into force were to bring about a substential limitation of the nuclear erms race. They were the first official end exclusively bileteral talks of their kind between world pawers.

The withdrawal of American troops from the Far East was under way and talk of troop reductions in Europe was elso viewed es e pert of datente.

Last but not least this country's policy towards the Eastern Bloc brought Bonn into line with its allies following frequent Isments that this was not the case.

Yet when the second half of the year drew to a close a great deal looked altogether different. The Salt talks had led to no result and only recently President Nixon cautiously held forth only the prospect of partial agreement on myster limitations at heat nuclear limitations et best.

US and Nato pundits had begun to warn against a growing military imbalance between the blocs to the West's disadvantage. Far-reaching US troop cuts in Europe are no longer on the carda and European members of Nato are increaslngly being called upon to boost their own defenca outlay.

Despite the advance concessions mada by the United States Vietnam is no nearer peace. The Middle East situation has worsened and continued Soviet arms supplies to Arab countries have been followed by American deliveries to Israel,

At the same time the repercussions of the ettendant increase in Soviet naval presence in the Mediterranesn first made its presence firmly felt efter Mr Nixon's. visit to Italy, President Tito, the Sixth

Many American observers came to consider Bonn's Bastern policy to be less a contribution to detante than a welcome initiativa (from Moscow's point of view) making the Kremlin feel attempts to bring about a relaxation of tension with Weshington in terms of nuclear agreements and a peace settlement in the Middle East and elsewhere to be less

Whet, then, is the situation as regarddetente? Cen it atill be regarded as a characteristic of the present international political acene or are we well on the way to a return to cold war?

The limited range of detente formulas has at all evente become apparent. Little hes been achieved in the way of progress. In the final enalysis detente, like peace, is

Weshington and Moscow still have the last word and the climate of opinion between these two has taken e turn for

The most specific contribution towards relexation of tension between the blocs mey well have been Bonn's as yet unratifled treaties with Moscow end Warsaw, eliminating as they do e possible local trouble spot by means of painful ects of renunciation on this country's part.

But even they can only be effective as a contribution to detente in world terms provided davelopmente in Eest-West relations progress eccordingly in other sectors

In the long run it is inconceivable that a further reeching relaxation of tension beween the Federal Republic of Germeny and its neighbours to the Eest might be accompanied by a reactivation or intensification of tension between the Soviet Union and the Uoited States or even a

other intentions such as whether he considers the additional position of party chetmanship not worth struggling for ar not, If he does not eith for the party chainnauship it is all the more obvious that he will appear in Hamburg as e readymade candidate for the chancel-

CDU-a party in search of

a chancellorship candidate

Since ell the signs are that the present overnment in Bonn will survive the next few months their seems no need for excessively hasty action. The Düsseldorf party conference would provide en opportunity for defusing ell speculation. In the meantime, however, the mein item on the CDU's agenda, particularly in its mora far-flung regions, should be a more intensive study of the question of who is to follow Kurt Georg Kicainger, end what is mure important, who is to lead the campaign against Brandt.

Althuugh the choice of a candidate for already gained in Bonn it could be fatel for the CDU if they furgot that one of the first duties for their candidate for the

Christian Democrat members who are full of praise for Rainer Barzel in lus capacity as parlimentary party leader tend to shrug their shuulders when his name is mentioned in connection with Palais Schaumburg.

No one dentes that Barzel Is an nutstunding and effective leader uf the Opposition. But he is not pupular. Oceasional rather pathetic stylistic frills cannot hilde the fact that he is generally regarded as the smooth managerial lype who gives his mudience the uncumfortable impression that the next day ha could be saying exactly the opposite with equal eliquence. In the age of television cameras that strip a politician bare this is a

The almost perfect enimplement to Barzel as a possible candidate for the chancellorship would be Helmut Kohl as

Quite apart from the Barzel-Kohl bsttle the CDU abould attempt to nip in the bud manoeuvres to undermine the party political conference which is the most powerful body of a democretic party.

chancellur is made easier by experience chancellorship is to win the election for

party chairman if he were prepared to let his ambitions rest with this ambitions rest with this position. But

Kurt Gaorg Kiesingar (left), Halmut Kohl and Rainar Barzet, all possible CDU both feel themselves called to the duty of

leading the next Fedarel government and capebla of doing so. Kohl gives credible indications that conservative and progressive ideas can go hand in hand, and he would without doubt prove a good party secretary and even a good chancellor if it were simply a quastion of providing the CDU's chalenge to the SPD programme of domestic

However, anyone who is toying with the idea of handing out these two leading positions to Rainer Barzel and Helmut Kohl must accept that by so doing ha is nutting s severe burden on the party's

There ere those who would consider this dual leadership too risky, but they would not like to vote for either fisrzel elone nor Kohl on his own. They would have to search fur an alternative and in so doing they would frequently come up

against one nama, The man in question has proved to CDU members in all fuur corners of the country that he line outstanding qualificetions but he is a man whom they - ond licarch knows why - cannot trust to overcome the obstacles within the party. The mon in question has olready spent msny years as Minister of the Interior, Foreign Minister and Minister of Defenco. Gerhard Schröder,

ministers who managed to hold a place in the tight party leadership committee at the Mainz party polltical conference. He voluntsrily chose to take a seat on the back benches in the Bundeatag and dld not give up his, obviously tactical, "vow of silence" in the Bundestag even when his friends in the party started to believe that this was a sign of resignation. It is possible that this loner, who has been wsiting his chance for more than ten years, Issa become accustomed to the walting game to such an extent that he is missing the chance now it is finally on the way, and that he will see the crown snatelied from before his eyes by younger party members.

Whether his reticence is msking the CDU forget that with a now fully recovered Schröder they have a trump card to play is something that time slone

At any rate this man with years of ministerial experience can scerely be outdone by anyone on the important field for the Federal Republic of foreign policy. The fact that has just undertaken a trip to Moscow adds woight to the theory that he is a strong politician in precisaly that sphere where he is not accepted by his colleagues as no olly.

On the domestic policy scene Schröder has menaged to boost the respect of friend and foe alike for lilns by the noble manner in which he took two severe defeats, firstly for election as president and secondly election to the Bundestag

His carefully weighed-up and olweys well tempered statements have carned him the reputotion of e fair and responsible atatesmen. He has long since thrown off the aggressiveness that marked his years in the Ministry of the Interior.

Joint efforts, particularly in the sphere of foreign policy have always struck him as more essential than irreconcilable po-

Schröder is, therefore, a glowing examnever looses hie sense of proportion and always keeps en open mind ebout vital new ideas.

Without doubt Gerherd Schröder Is a man who often makes it unnecessarily difficult for even lus friends to get to understand him.

This does not excuse a party that wanta to return to power from its duty to force him to show his hand et least within the party and say whether he is still at their disposal.

Is there any reason why a party should rule out a loncr, particularly when thus loner might be a convincing alternative to Willy Brandt as chancelior? After all Adenauer was a loner. Ludwig Harms

They are obviously hoping that their insin rival, Kohl, who is still tied up by the forthcoming provincial assembly elec-tions in the Rhineland-Palatinate, can be pushed to one side so that they can nominate their candidate for the chancel-

## Young Christian Democrats less embarrassing to the party

Loung Socialists and Young Democrats cracy, that is to say for democratic development from below.

At the same time the young righttime than the Junge Union has been causing the Christian Democrats.

This situation was in no way changed when the leedcrship of the Junge Union was transferred from Egon Kiepsch to young rightwingers have echieved greater self-awareness. In addition to this the opportunity

they have for influencing the parent party have increased since the CDU took up the Opposition benches, However, the young people in the CDU have not intention of tearing up the CDU committee's draft programme, but will simply try to influence It.

The young CDU members in contrast to the young Socialists and young Free The man in question could only be Raleer Barzel since he would have been political proportion. Directly proportional to the age of members the selected by the parliamentary party. It is a vain pursuit to speculate on Barzel's suitable understending of the term demo-

wingers reject secretary-general Bruno Heck's interpretation of democracy as a mere form of State organisation. This is particularly true of the party's up their involvement on e Fed- Jürgen Echternach of Hamburg. But the Union will leave no stone noturned to

At the same time the young right.

achieve equality of opportunity.

As far as Soziale Marktwirtschaft (this country's system of free market economy) is concerned the young Christian Democrats call for greater emphasis to be laid on the "sozial" aspect and with this attitude they are doubtless more in agreement with the original draft plan drawn up by Helmut Kohl,

The fact that they point to the necessity of granting recognition to the Oder-Neisse line and perhaps to the German Democratic Republic as well can be taken as e warning to the party that it must be prepared to make a few sacrifices in its foreign policy.

(Handelchintt, 12 Senuary 1971)

## THE PAST German Empire founded a century ago

The German Reich came into existence L one hundred years ago on 1 January 1871 when the constitution came into force. But the Reich was still incompleta - the treaties with the South German states had yet to be signed.

There was a twa-fold process leading ta the drawing up of the constitution. On the one hand there were the monarchie, federalist powers and on the other tha parliamentary powers. There were the princes who concluded tha treaty and the parliaments who decided that they were to be concluded.

The basis of the constitution of the North German Federation, ratified by the North German Imperial Diet a year after the Six Weeks War against Austria in 1866, were Prussla's treatles with the states of North and Central Germany.

Blsmarck had his way when the constitution was drawn up and it was fasitioned so that the South German states of Bavaria, Wirttemberg, Hesss and Baden could later join. At that the they ramalned independent though they had concluded military alliances with Prussia.

The majority of the population of the southern states too viewed the war against France that began in July 1870 as a national war. Their participation in the war was a step on the way toward

But the South Geman monarchies and their governments hesitsted and some were in plain opposition. But the pressure of a passionate national movement grew from below.

This mood received powerful impetus following the victory at Sedan on 2 September, the capture of Napoleon III and the collapse of the French Empire. Bismarck could then have concluded an immediate peace - but that would have meant no annaxation.

The army however secratly demanded the acquisition of Alsaca and Lorraine for strategic reasons. The national movement demanded the territories loudly as a reward for victory.

Bismarck agreed to their demands primarily for tactical reasons. Ha later regretted this. The war continued and the victorious summar campaign became a hard winter campaign.

Bismarck wanted to win over tha southern states to his proposals for unification but he did not want to force them. But ha used tha change of mood after Sedan to accolerate the process. The date he planned for the foundation of the Empira was I January 1871.

Bismarck hegotiated in three levels with representatives of the South German governments, with the North German Diet and parties and with foreign countries. Whatever one's views on the foundation of the Empire, it has to be admitted that Bismarck's tachnique was ingenious.

Treaties with Baden and Hesse were ncluded on 15 November in Varsailles. the Prussian headquarters during the slege

Negotiations with Württembarg and Bayaria were far mora tricky. Both states lemanded, special privileges, especially

Bayaria. Negotlations were complicated by the fact that the federalist interests of the

The proclamation of William as Kaiser of the German Empire in the Hall of Mirrors at Variable 1871, the painting by Anton von Wernel. (Photo: Utisiein/Hanfstaangi)

monarchies had to be harmortised with the interests of the provincial parba-

But this conflict also offered the opportunity of playing off the two sides against each other. The treaty with Bavaria was signed on 23 November and the treaty with Württemberg followed on

On 9 December the North German Dlet, which did not yet include any South Garman members, accepted almost unanimously the treaties with Baden, Hesse and Württemberg and the constitution, which was very much like that of the North German Federation.

Only the majority for the treaty with Bavaria was in doubt. But there was a majority, largely because of the party discipline showed by the National Libe-

They thus accepted a constitution consisting of texts that were still incomplete and four treatles with the Southern

On the same dsy Eduard Lasker, a National Liberal deputy, wrote to Otto Elben, a party colleague from Württemberg, "At last there is a German state. . . History no longer knows any German question." The actual date of the foundation of the Empire was therefora 9 December 1870,

But no sooner was the constitution accepted than it was changed. It had still spoken of the German Federation and the Federal presidency that lay in the hands of the King of Prussia. These terms were replaced by Reich and Kalser, designations that had been valid up to 1806.

The King of Bavaria wes to offer the King of Prussia the imperial crown. After tha experiences of 1848 no ona wanted to leave this to parliament. Besides, it corresponded with monsrchic ideas.

On ig December in Versailles a deputation of the North German Diet, concurring with Germany's princes, asked King Wilhelm of Prussia to consecrate the work of unification by accapting the imperial

As there was no imperial crown however, a coronation was not possible. But there had to be a symbolic act of investiture as this corresponded with the national mood of the timas.

At the suggestion of the Crown Pinca, 18 January was chosen for the proolama-tion of Kelser, as it was called. On the sama date 170 years earlier Elector Frederick III of Brandenburg had been erownad King in Prussla.

The proclamation of Kaiser was courtly, military affair that took place in Versailles' Hall of Mirrors. Ona of Bismarck's ghostwriters remarked that the empire was not bom on 18 January, but

Three days later the Bavarian parliament ratified the treaty setting for h the eonstitution with two votes above the two-thirds majority.

The first German Reichstag was elected

## Eighteen authors sum up 25 years of German history

Eine Deutschiand-Bilanz, editad by Karl Dietrich Bracher. Published by Kindiar of Munich. 383 pagas. Prica

he conclusions drawn about the development of this country since 1945 in this collection of essays are on the whole negative, which is not surprising considering some of the eighteen authors who have contributed to the

It is well known that Sebastian Haffner long viawed the Federal Republic's foreign policy with scepticism. It is well known what liberal educationalist Hildcgard Hamm-Brücher thinks of educational policy here.

We know how discontented Otto Brenner is with social developments and how Theo Pirker views the work of the trades

None of them sings songs of praise glorifying the Federal Republic. But they do not just indulge in polemics, attacking everything around them. They try to adopt critical distance and make wellfounded analyses.

The volume contains information on urban building, the Churches, research. culture and education. The book surveya many subjects in condensed form,

Sebastian Haffner takes A.J.P. Taylor'a theory "Nobody can understand the Germans without taking into consideration their desire to imitate everything Western; and nobody will understand the Garmans if he ignores the other side of the coin - their stubborn desire to annihilate everything Eastern," and trics to prove that it also applies to the Federal

This theory is obviously not true for the Federal Rapublic when stated as extremely as this. But on one point Haffner agrees with other authors such as Manfred Rexin end Helmut Lindemann — Adenauer's government made the mistaka in 1952 of not taking up Stalin's offer of reunlification in exchange for non-antry of tha Westarn alliance.

Two other contributors - Leo Brawand and Otto Brenner - accuse the Christian Democrat government of omissions in the economic and social fields.

They state that the enthusiastically axtolled market economy could nevar hava been described as "social".

Leo Brawand, an editor of the weckly Spiegel, calculated for exampla thet the small group of less than three million self-employed in the Fedaral Republic had by 1966 already amassed about seventy per cent of wealth gained since

Hildegard Hamm-Brücher, the Free Democrat politician, sees four phases in the development of educational policy during the 25-year period.

## Gustav Heinemann brings a wind of change into the presidency

The photograph of n Gustav Heinemann who does not mind taking an accasional swig from a beer bottle should provide one of the final touches on the publie's picture of him as a President of

His eager advertising agents hope so anyway. This would also be welcome to Heinemann even though he says defensively, "I didn't invent tha title."

People have busily been painting the portralt of a man who intantionally avolds the semblance of glory surrounding a hesd of state and instead mixes with There have indeed been many changes

at the Villa Hammerschmidt in Bonn, Things that had not occurred there before became part of averyday routine. Receptions for distinguished guests alternated with invitations to the "ordinary people". There were discussions with artisans and

But, consciously or not, there was always a slight suggestion of intentional flirting, it seemed as if Gustav Heinemann wanted to prove to the large scetion of the public who viewed his behaviour critically that he intended to continue his new style notwithstanding all ifs and

Today, some eighteen months since he first became President, Heinemann seems to have get into his strida. Ha has become more confident in his new position.

That is shown by the fact that he no longer reacts so aggressively whan something doss not suit him. Recently he even minde peace with press photographers to particularly aflergie.

And, flually, he seems to heve reulised that there are some superficialities that are insoperably linked with the office of

During this course of this development tha vsgao term "president of the people" also took gradual shape. Gustav Helne-mann and his wife took it upon themselves to raconcila the greet majority of the pepulation with minority groups who had been forced to the periphery of society through no fault of their own.

if recenciliation was not possible he was at lesst concerned with awakening understanding for those people. The President wents to find a form of sympathy that does not alienate the mass of the population.

Same time ago he was the first German head of state to meet a group of conscientious objectors working in Betliel. This was undeabtedly meant as a essture to remind the critical public of the basic right of conscientious objection to military service guaranteed by Besic

## The diplomatic scene in Bonn

A rehbishop Corredo Basile, the Papal Nuncio in Bonn, is the doyen of the diplomatic eorpa. An honour based on the length of service by envoys in their host country.

Archbishop Bafila is at the same time the diplomat who has represented the biterests of his sovercign for the longest period of time in Bonn where he has been accradited for more than ten yeara.

Apart from the Archblshop only the Liberian envoy can look back on more than ten yeers of diplomatic activity in

That is a long time in the life of a diplomat. Usually envoys have to pack their bugs every few years and, if they are ambassadors, present their eredentlals to a new King or president.

There is a good reason for tha diplomatic custom of not leaving a representative too long in one place - foreign ministries in all countries fear that close friendship and too much sympathy for the interests of the host country will rob diplomats of the critical distance they need for objective analyses and reports.

The "List of the Diplomatic Corps" that appears quarterly comprises ninety. ambassadors plus the permanent charge d'affaires of Laos and the head of the Finnish trade delegation. Because it is eempelled to remain neutral Fidand does not have diplomatic relations with the Federal Republic.

Some of the diplomats listed do not reside in this country. Some of the small territorics are accredited in Bonn but have their embassics in London.

The largest ombassy by far is that of the United States. The quarterly list contains the names of 62 porsons there with diplomatic status.

To this total must be added the rest of the ambassy staff from the United States or the Fedorel Rapublic, ranging from secretarics to chauffeurs. Sixtoen diplomats ere responsible for quostions of tmde and aconomy alone.

There is also a large milliory group, handed by a mejor general, Thirteen army and merine colonels work in the Ameri-

csn ombassy in Bonn. There are 43 diplomats in the Russian embessy but nona of them are described as officers. The Franch embnssy has an even largar atnff - 48 diplomats.

On the other hand many legations consist of only two, three or four diplomats Iceland, Paraguay, Panama and Honduras come into this category.

it is remarkeble that medium-sized countries such as Turkey have an astonishingly high number of staff in their embassies at Bonn.

Mora diplomata work in the Turkisia

embassy than in the Japanese for example because of Turkey's military cooperation with the Federal Republic within the framework of Nato. The Afghan embassy represents the interests of the United Arab Republic and

Iraq while the Australian embassy represents the interests of Cambodia. The post of Guatemalan ambassador has not been filled since the last one laft

the Federal Rapublio after the murder of Count Sprett, the Federal Republic's ambassador in Guatemala. .The name of the former Iranian ambassador Esfandlary, ex-Queen Soraya'a fathcr, is still listed as a legation official with

the title of ambassador. His German wife Eva is described as "absent". Most embassies are in Bonn and Bad Godesbarg, the Australian, Rumanian, Swiss, Iranian and South African cmbassies era in Cologne and the Russian

embassy in Rolandseck. Georg Gusmann (Handelsblatt, 11 January 1971)

## Book trade must buck up its ideas to attract the public

## Frankfurter / 200 Neue Presse

ext yeer Santa Clous could be parading the streets in summer with lus sack full of books and games for children. If he does go on this hot, dusty march it will be as an ambassador of the book trade, commissioned by the Book-shops' Working Group and brandishing Bookshops are there for everybody".

The Sente Claus idea is still being discussed as only one of many plous to encourage potential buyers. The book trade - meaning bookschers - is graduslly beginning to weka up.

Two years ago the Bookshops' Working Group (AdB) was set up and 620 of the two to two and a half thousand bookscliers are now membere.

The organisation works in two directions. It courts the public and informs and appeals to the trade so that individual booksellers, the ones with least capital, become more enterprising.

The energetic strategy drawn up by the AdB in Frankfurt is besed on an understanding of the economic situation. The bookshops' turnover is continually increasing but their share of the market, compared with the total sales of literary products, is nonetheless on tha decraase,

This means in the long term that cooperation is necessary and urgent if the traditional book trade is not to be forced out of the literature end information

Other forms of distribution have long sinca proved euccessful. Apart from book clube there are the cantrally directed chains - Montonus is the best exemple that carry out the functions of tha bookseliers, es well as the book trada in department stores, stationera and general stores end, lastly, mall order firms.

Buyers of books may well be indifferent as to whom they pay their money, May be. But it is they who have a vested interest in the book trade.

Only the bookselier with his own views, partialities and commitment to a particuler author or book con build up a wide-ranging atock of bterature, including academic and scientific works.

Where things are determined exclusively by economic points of view all stock other then the most popular is unemployed capital.

Forced by economic changes, the book-scilers ere only just beginning to think about cooperation. Twenty-one publishing concerns such es Bertelsmann, Du-Mont, Econ and Moldan are supporting their working group that has established itself as a centre to hatch out ideas and has above all drawn up e list of proposals for joint advertising in 1971.

Every month starting in February eighteen new issues are to be highlighted in advertising and poster campsigns as the "Tip of the Month".

From the end of February to the end of May there will be another advertising slogan - "Plan your holidaye with window advertising and poeters will be linked with a epecial compe-

There is no doubt that Astrld Lindgren alwaye comes out of comparisone better, There will elso be a Cheap Book Week in the opinion of adults at least. Even her end the working group will provide their members with epecial offere of recently most critical critics admit that she has imagination, humour, characterising etyle and a wey of writing for children that is published books.

Shopwindow advartisements will be provided every month and the AdB periodical Lesen, given away free by the trade, will increase its circulation from 100,000 to 150,000 copies.

There is also the Sante Claus pian. But

the publishers have misgivings, believing that the public could be engered if this symbol of Christmes is used for ed-

vertising purposes in July. Perhaps a famous fairy tale figure or e famous children's book charakter will ba sent out on to the streets instead.

The edvertising campaign prepared by an sgency has one firm aim - buyers who left school as soos as they could must ba won over. Their fear of entering bookshops, borne out by surveya, must be overcome. This is the feeling of insecurity thet overcomes the uninitiated on seeing overleden booksheives and essistents whom they consider to be omniscient.

There is slso psychological advice on this subject. Booksellers should not serve purchasers of purely amusing litereture condascendingly.

Giving books es presents should be mede easier by special showcase displays, edvice end book tokans. A corner for cheap novels is recommended along with spacial axhibitions.

The tip "soft background music may be advisable in soma city shops" sounds mysteriously seductive. But music does inhibit aggressive tendencies in insecure

Feced with such rules from the sphere of the consumer industries, booksellars must wonder whether they are to jump on the advertising bandwagon and influence people's subconsciousness or whether they would not be better advised to aim at the critical faculties of thought in potential customers, aven though it is a question of noney and competition.

The Bookshops' Working Group has recognised what prospects this competitive struggle could have in the futura. The existence of many bookshops depends on their being able to succeed in

But capitsi and markets are needed. Department stores hava thesa, but tha bookshops do not. Anyone wanting to compete will have to merge. The possi-bilities of cooperation between independent bookhops ie stili being examined. Lawyers and -business economists ere still studying the results achieved by ploneers in the trade.

The possibilities of retionalisation range

from cooperative buying methods, in creesing the discount rate when bookshops buy books, to the suggestion of Hamburg wholesaler Curt Lingenbrink to form trade chains withby which businesses remein independent. This ie not the case with centralised shop chains.

The AdB intends to study ell plans of this typa before meking recommendetions to its members.

One things is already clear - rationalisation and cooperation cannot be evoided. The book trade is in the middle of a structural change end it will only be abla to remain stebia if it does not make the misteke it did years ogo in its competition with the record trada end does not fell behind on the market for the new meille.

'Chronochromie' - Tetley's most poetic creation - in Hamburg

Marceeu's mime drame Candide was in fact supposed to be the high-spot of the evening at the Hamburg Staatsoper.

But this had to be postponed end so a bollet premiera was staged in its place. This was Gien Tetley's Chronochromie, hesed on a composition of the seme name by Ollvier Messigen.

Tetley, It will be remembered, is the chief ortistic adviser of the Nederlands Dans Theater. Hic has aiready made e name for himself in Kiel where there have been developed in Jerzy Grotuwski's theatre, laboratory and he has bong been guest performances of two of his creations Mythical Hunters and Embrace fortunate enungh to be suppurted in this venture with the gonerosity of the Wip-Tiger and Return to Mountaly.

Fur six years requests were made to Lie has proved conclusively that the Messiaen to release his work as the score horrific events that are depicted in the for a ballet, but they fell on deaf cars leburutury can have a counteracting

> it could be that the composer fearad for his music if it was made into the more "concrete" ert form of ballet. But now he need not regret his decision to release that work for beliet after, all.

> The bird voice imitations of the music to Chronochronile are not likely to be mistaken for a musical tour of an aviary; likewise in the ballet the dancers' visions of flight end tha force of gravity are also

not likely to be tsken for trivial simulation. Chronochromle is

probably Tetlay's most poetic creation. Movement develops from a magicai tableau, from e soft spectral vision that is reminiscent of cocoons and flower panicles in epring, with misty vapours in the background and whitish-yellow light flooding the scene. whita costumee seem to be frea from the pull of grevity and light as gossamer in this setting designed by Rouben Ter Arutunian. They fly in swarms, they circle round each

Dancers in Gien Tatlay's 'Chronochromie' produced in Hambura (Photo: Fritz Peyer)

other pleyfull and one of a time they leave the group.

It appears to be wooing and unification, the beginnings of a drama are seen to evolve, there ere threats, there is hurtfubress, there is lonelinesa.

The range of movements stretches from the heights to the depths and vice versa. Motifs of rising and falling are variceated in manifold weys.

There are small swift movements. movements that are reminiscent of the wings of a fly without being direct builtation. Gleo Tetley does not quote from Noture.

The title Chronochromie signifies the inferweeving of tonal colours and time values. The ballet involves a number of finmous choreographies end e number of emoua chorcographers.

But the applause of the premiere was only sufficient for Tetley, his scenic designer end the premiere dancors. Greet eppreciation was shown for the pas de ienx, which Meurice Bejart craeted, basd on the five pieces for string quartet by Anton Webom.

The classical pas de deux is here only the structural fremawork and the besic formule. But Webern's miniatures are the foundations for a danced dielogue so gripping that it could herdly be improved upon. This is e great opportunity for the dancers to make the most of the body's expressive nowers.

Just for the record I must mention the overture end finale of this Hamburg evening of ballet. These were George Baisnelline's Agon and John Cranko's Jeu' de cartes, choreographed versions of compositions by Igor Stravinsky.

The first, despite the imagination that had gone into it and the brilliant wey it was danced was too strictly constructed. The eccond was a successful joke, e game of poker with living cards, coocciv-

ed in a buriesque menner and served up

with wit. Purists grumbled, of course, at such a popular finele. There were even a few catcails. Thesa were certainly not directed against the Hamburg company which has a number of outstanding soloists and a virtuoso ensemble

Perhaps they were upset at Jean-Maric Auberson's conducting, but apart from serving the music up too "thickly" he put in some sterling work.

Balanchine, Tetley, Béjart and Cranko - thie time the Hamburg Steatsoner has served up a bailet evening that is worth going to see.

### **EDUCATION**

## 1970 - UNESCO-sponsored Education Year highlighted the issues

ducation Year is behind us. It was the opinion has prevalled that five-year-olds can learn through play and would special effort in this field.

Minister Hans Leussink replied that the policy statement of the new government stressed that education and science stood at the top of the list of raforms that were to be carried out in the Federal Republic.

Looking at the past year in the light of such high aims and expectations, the results are modest. Comparing the result with the results of past years, there has been some progress in 1970.

It was altogether a year of education. Educational issues occupied people - in our country at least - more than ever

Apart from anti-authoritarian educstion that achieved greater importance as material for cocktall party conversations than in practice, there was a lot of discussion on two subjects - pre-school education and career training.

At present one and a half million apprentices are being trained in this country, a figure that is five times as high as the atudent population. But more than five times as much is probably written and spoken about student problems than those of apprentices.

Last year this forgotten majority reachcd public attention. Extreme critics of the system of apprentice training spoka of exploitation and demanded that training in public institutions should replace apprenticeships in small and medium-sized firms that ore forced to look for cheap labour because of competition.

In the debate on pre-school education

general René Maheu in January 1970. All learn a lot if the kindergartens gave countries and peoples were to make a corresponding education and had enough staff and accommodation. for a shorter period of time and be of equal standing with teachers who had trained for a longer period and in more

Pre-school cducation was also recognised as a means of coming closer to tha equality of educetional opportunity de-manded by all political parties and ideologicel groups.

Tha differences in the Intellectual and cuitural climates in the parental home that has such s great influence on children's chances when starting school could be ironed out somewhat through pre-school education.

in 1970 too the teacher shortage remained the key problem. Surveys among pupils about to take their schoolleaving certificate have revealed that thare increasing reediness to enter the teaching profession, but at the same time many fall by the wsyside.

When faced by a partly acadanuc study of education and a study of their own scientifically somewhat bridled subject many young education students who wanted to become teachers lose their entluslasm for the profession.

The Education Ministers Conferenca failed in its attempt to standardise teacher training, making it mora practical, and caused the most serious crisis in its years

It was proposed that teachers should no longer be paid (and respected) according to the typa of school they teach at. Instead they should be diffarentiated as grade teachers depending on the age range they teach....

> on many issues, completa indecisivenass. During the course of 1970 the central government's framework University Law devaloped from Minister Hans Lenssink's fourtean points to a ataga where it is now ready to be submitted to the Bundestag. following extensive discussions and saver-Various groups at university - professors, lecturers and atudents - have made a number of criticisms of the various drafts but, aithough split (at association level at any rate), they did agree that the influence of the Stata on the universities

should be kept as low as possible. Only the Freedom of Science League set up last autumn issued statements (not always free from contradiction) which gave rise to the impression that it was calling on the State to infringe drastically upon the independance of the universities so that a revolution of the whole order of the State would not follow on from tha "falsely understood" democratisation and

reform at university. There was no reason for such a gloomy forecast in 1970. It was a relativaly quiet year at the universities. But the reforming unreat that once sought outside expression now continued within, partly brought more work than ever for all study in their profession too. concerned. Again It is only the activists, the extremiat groups who have devoted themselves to lt - the majority of

atudents continued to be silent. Admission restrictions - the numerus clausua - has bean extended to other subjects but the public has grown thred of

All in all, tha year brought some important changes in the public climate and in the substructure of education policy, a better basis for the fresh struggle

figure for beer is between tweive and fifteen degrees. Nutritional expert Professor Glatzei retorts, "No publican would dare serve hs guests such a ataie, flat drink,"

Professor Glatzel believes that all medical fears about the harmfulness of hot and cold food and drink are unfounded. There was no scientific proof of the

fact that the tiny thermo-receptors in the umen mucous membranes suffered from heat or cold, nor was it this that cold drinks caused ulcers. On the contrary, cold milk is often used in medical treatment to alleviate bleeding nicers.

The text books even have a binding rule Food and drink are not digested at the for bread - it should not be over thirty same temperature as they are eaten or drink. A 63 degree stew cools down to Professor Glatzel is to be applanded 4 i degrees ou its way to the stomsch when he asks why fresh toast should not After fifteen minutes It has already be eaten at the same temperature as reached body temperature.

> Cold drinks warm up by more than twenty dogrees when passing through the mouth, thront and oesophagus. Prufessor Glutzel maintains that cold drinks ero refreshing and invigorating.

> The best temperature for white wine, beer and cula is muder ten degrees. Cunsumed in this way, they never cause complaints of the mouth, ucsuphagus, stamuch or intestine.

Titis is not the first time that Professor Glatzel has campaigned against centuries-uld dietury recumunendutions. The Professor attecks kitchen superstitions at urata of une a month. He has su far shot down:

\* the recumniculation only to eat light fure in the evening. "People sleep well after hinch", Professor Glatzel says. "Why should the snino meal encourage sleen at inidday and inhibit it ut night?

\* the bailaf that old paoplo should guard against spices. Profassor Glatzel snys that oid people lose ail dastre to cot if they stick to brotis and food with o iow scasoning content. They do not need iarge quantities but what they do eat should at least taste good.

\* the old warning given to children not to drink too much water in case they swell up. Professor Glatzel disproves this by stating that children have o greater need of water than adults. If they want to drink more there is no reason to forbid it.

\* the widespread belief (particularly among doctors) that black bread is more heaithy than white bread. Giatzel says that black bread takes no more masticating than white bread. It also leaves more emains in the mouth than fresh white bread. This is of decisive influence on

But Professor Glatzel shies away from attecking one old warning. In a study of the right nutrition for young people he stresses that sweets before meals should be strictly forbidden.

Otherwise ell healthy people should eat what they lika - as long as they take care that they do not become too fat. But people should not be too choosy either, says Professor Glatzel. His motto reads: "The aim of sensible upbringing is to make children eat what is on their plate without

## Transplant centre in West Berlin

A transplant centre is currently being set up in West Berlin by a surgical team consisting of scientists from the Free University who will first of ail concentrate on kidney transplants, the only type of organ transplent that has psssed beyond the experimental stage and that can be considured a proper course of

The team including doctors with such an international reputation as Professors Bücherl end Nasserin, has been attached to tha Weat End Clinic where they hope to use their experiences in kidney transplants to prepare plans for transpianting byers, hearts, lungs and bone marrow.

Surgeons, nephrologists, immunologlsts, physiologista and urologists are involved in the Berlin Transplant working

group.

The Free University Board has so far granted the team about 73,000 Marka. The scientists have asked for funds of almost half a million Marks to extend Berlin Transplant In the next two years. A large part of this moncy will be needed for equipment to conserve organs and organ storage units.

(Hannoversche Allgemeine, 4 January 1971)

## Spectromats provide high-speed blood analyses

Clentists of the Biological Physical Research Society in Oberjenslagen near Herrenberg linve developed e new automatic method for tracing elements in the blood.

With the help of emipment that condenses blood samples over a filament of 24,000 voits in a matter of seconds and then examines it with a spectroscope evan the smallest quantitles of 22 different cliented claments cun be traced. Their exact quantity can then be calculated by

A dispusable syringe is used to take tan cuble centimetras of blood from the patient first thing in a morning. Tho sample is then sent to the institute in o test tube that prevents congulation of the

It is necessary to use e disposable syringe as even the smallest traces of calcium or other clements from the stoam used for sterllisation purposea would bnmedlately affect the result of the

During the condensation of the blood sample in the apparatua called a spectromat, the characteristic spectral linea occurring in the apectrum of light give information about the existence of the individual elements in the blood, as in usual spectroscopic methods.

Their quantity can be worked out from the intensity of light of the various lines. This happens electronically in spectro-mats with the help of an extremely sensitive photo-element called a muitipil

The mean values for the individual clementa are calculated three times in this before being automatically arranged into tabular form by a computer and compared with the normal values calculated by examining a representative sample of healthy people. The computer automatically points out any divergence from the norm.

Two days after dispatching the blood sample the doctor receives this table giving him exact information on the existence of individual elementa in the blood of his patient.

Similar equipment had only been used previously in industry and large chemical installations such as refineriea. This is ita first use in the field of medicine.

After the five thousand examinations made up to now scientists are therefore not completely sure in many cases what combinations of what quantities of eiemants could be characteriatic for certain

Doctors were surprised by the high chromium and lead contont in many of the blood samples. To all appearances the lead had partly replaced the iron that is otherwise in the blood. Scientists obviously do not yet know the extent to which this high lend content is due to anti-pinking firels.

They balieve that various disturbances of the memory and the ability to concentrato may be due to the increose in land content, especially in cases where the blood also contains high quantities of

magneslum. Researchers believo that Impotence, could be linked with unusual distribution patterns of the elements in the blood. But extensive work will have to be done in this field before really valid conclusions can be made. Christoph Wolff (DIE WELT, 5 January 1971)

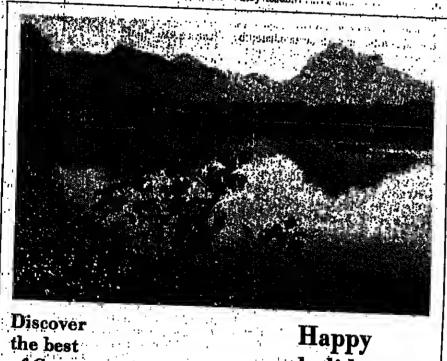

**Enid Blyton charms** 

Continuad from page 6 booka that Enid Blyton has written contradicts what she herself once cleimed

about them: "I am proud of never having given ohildren a single nightmaro." Astrid Lindgren's reply to the question of what she thought about Enid Blyton is also of significanco: "She was a particularly charming lady. She must have had

a good and harmonious family life." It can now be forecast that the new. film based on books by this particularly charming and particularly controvarsial noveliat will increase atill further the demand for oll books.

And the parents who themselves have bought these books as presents will react to the pleasure shown by their children as parents throughout the world react to the writer — with helplessness, a certain amount of uncasa and with many justifled arguments which they will not voice as there is no argumant effective enough against Enid Blyton. H. Darnstädt (STUTTGARTER ZEITUNG)

### THE ECONOMY

## 1971 will mark an important turning point in economic developments

THE GERMAN TRIBUNE

Our economy plunged into 1970 travelling at far too great a speed.

The brakes had to be applied hard, but it was only towards the end of the year that the braking effect because to be fall in the first six months of this year. There

cost of living to rise by about 3.5 per cent. It is not expected that there will be any slackening off of price increases in the first six months of this year. There

old question that is always asked when will now be making their effect felt. we embark on a new year, but this tims it is vitally important to find an answer since at an economic tuming point such

The main question that must be answered is whother we will succeed in getting our economy back on stable bines without causing too much upset along the way. Or will we leave 1971 behind in the midst of a depression such as in 1966/67?

Can we look forward to an end to the prices spiral and depreciation of the Mark or have we allowed ourselves to slip into that resignation in the face of inflation that has been shown in many other **COuntries** 

Needless to ssy many pundits and soothseyers have had a crack at forecasting economic developments throughout this year.

The most notable of these are tha committee of economic experts, the cconomic research institutes and the government ltself in the guise of lts medium-term finance plans.

All reckon with an easing off of the pressure on the economy that resulted from the 1969 boom, particularly in the second half of this yeer. But it is not generally expected that we will lapse into a grave recession.

Without doubt the cut-back in investments that has already begun will continue throughout the year with failing demand, high interest rates end samailer margins of profit for reinvestment.

The beginning of this new year and the next few months will bring into force measures that will help to offset this trend. There was a further lowering of investment tax, which was introduced along with value added tax on 1 Jenuary.

From 1 February degressive deprecietion will be back so that industry can claim tax relief on capital investments and the ten per cent tax surcharge introduced last year finishes on 30 June

At any rete the professional economics forecsaters predict an actual increase in gross national product for 1971 of about four per cent.

This does mean that the growth rate of our economy will have slowed down compared with the five per cent incresse in the year just ended end the eight per cent of 1969. But the likes of eight per cont increases ere exceptional and in this case it was the result of exceptionelly high productivity.

An actual growth rate of four per cent would still be a pleasing figure and the mentioned a figure over the 700 million British, for example, would be overjoyed if they could claim the same.

A disturbing factor is that with the Russia and Japan like to talk about smaller growths in GNP since 1969 a increased trading and closer ties the

Whereas the increase in the cost of living in November 1969 for the previous not eccept defcat. They called for new year was 2.7 per cent, the comparable rounds of talks, made offere and recomfigure for November 1970 wes 4.1 per mendations and obviously interested the cent. These two trends taken together Russians, for in December the bombshell show just how false the widespread from Moscow burst in editors' offices in assumption is that one only has to create this country that Federal Republic firms a little inflation and the economy is had loat contracts to the Japanese. bound to flourish.

In truth there is only a protracted end healthy economio growth when there is a basis of a atable currency to bolster it.

Unfortunately the prospects of stability for the Merk in the next year look bleak.

The committee of experts expects the belog signed, sealed and delivered for anything to do with this.

And so the result is the

some hefty wage and salary increases What about the new year? This is the towards the end of last year and these Demand is likely to incresse, too, as a

Trade unions should bear titls in mind as this uncertainty is always at its height. in the next few mouths and should exercise modsration when putting in further cialms. The Economic Affairs Ministry expects the increase in real carnings this year to be in the region of seven or eight per cent.

This should be the upper limit in view of the fact that the economy is quietening down. The committee of experts, however, forecasts that the Increase in real earnings in 1971 will be more like twelve per cent.

If the unions abuse their strength and try to push through wage and sslary increases of this magnitude without regard to the circumstances they will tragically have all the proof they need that their much vsunted (by themselves) sense of responsibility for the overall economic situation is a thing of the past.

If they do, it will meon that they have refused to make any effort to bring about the stabilisation of the Mark that everyone in this country, including the workers they represent, wants.

Every extravagant wage claim will be yet enother nail in the coffin of the Mark. The same accusation, be it added, must

be levelled at any company that takes auch inflationary salary graba meekly in the hope that it can offset them by bumping up its prices and getting away

it is quite clear that the value of money

panies climbed on board a jet to Moscow

tween cup and lip.

ference, being held in the Soviet capital,

This kind of creeping inflotion is far more pernicious than the other. Excessive demand can easily be queiled by economic measures, but counteracting overhigh wages sud salaries can only be achieved by further price increases or by msss sackings.

Both of these undesirables will be inevitable, however, if the trades unions continue their wages policies that are anathema to stability and which they have been pursuing for at least one year. Furthermore we must now beer in

mind that contrary to all expectations we cannot now count on exports as a saving grace to the same extent as in 1966. The reason for this is that our competitiveness on international markets has

peen seriously undermined by incressed costs and prices. At any rate when previewing the economic situation in 1971 opart from all the other imponderables trends by other countries are the great unknown. This is yet another reason why great caution

must be exercised in this country. Another aspect of the conomic scene which is difficult if not impossible to pradlet is the psychological climate and the way in which it will develop.

The Social Democrat/Free Democrat government is guilty of paying little or no attention to psychological factors oud their long-term effects on the cconomy, namely how people will react to the economic measures that have been linplemented, the product of the state of

In fact the government with its reforming zeal, its verbosity and its constant reflections on whet new hurdons can be heaped on the economy, not to mention its constant jockcying in economic and

Vehicles up to five tons in weight were able to cross this hiridge.

Further Copportunities !: for "reducing" construction costs and the hackbreaking effort of building houses are offered by other new processes such as tulmlar steel and hardened foam materials. Hayer tuneintsche Post, 4 Mecember 1919 Laverkusen has already succeeded in building an igino of fnam. This process involves covering a balkana with a diameter of six metres and a height of 3.5 metres with hardened foam. After three and a half hours the nir is let out of the

Erwin Mühlestein won the Grand prix International d'urbanisme et d'architecture in 1969 with a mobile, throw-away town-planning scheme at the sixth Biennale in Paris.

Since then he has designed six-storey buildings of plastic-moulding materials made from triangular cells. The building trade has, however, not yet realised the full potential of disposable houses.

But the more conventional branchea of

Mass-production or industrial pre-fabrication already makes it possible to produce one square metre of living space in seventeen or even seven hours whereas a delached house requires 34 hours per square metre.

Essen will also see the final stages of snother interesting building project, the Elia all-plastic house which will be produced by a Berlin plastics factory on mass-production lines by mid-1971.

Marks. The lightness of the materials used means that an Elts house can be crected almost anywhere and eo it is ideal as a holidoy home or a weekend retreat. But thia building system con also be used for ordinary estates. The individual units can be coupled together. A house with 140 square nietres of living space, for example, can be pre-fabricated in four weeks and erected in two days by six people. The price per square metre is approximately 750 Marks. Conventional buildings, however, coat on average well over 1,000 Marks per square metre.

On to Castrop-Rauxel. There we find the 200,000 square metre Uropark V 2000. At the entrance to the park there is a tubular house standing on four stilts. might like to buy such a thing as a weekend live there on trial.

The tubular house is 15 metres long (approximately 50 feet). Whereas most houses stand this one tends to lie, and does give the impression that they've lander

Two men were instrumental in putting the tubular plastic house in Castrop-Ruuxel. Firstly the urchitect, Franz Helm-rich Dutler, 45, from Sunkt Gullen, Switzerland, who developed this prototype and was keen in keep it in Europa.

The According to the central association of the building trade before contracts can be The whole building is made from one completed supplementary charges have already been swallowed up by price rises. grams, approximately 19,000 pounds. This means that output in the building The whole thing takes just one hour to trade is not likely to increase greatly this

Harsh criticism is lavelled at the Bundesbank for not considering releasing the economic brakes a little. The building trade snokesmen consider that the Bundesbank should start doing some longterm planning now. This applies perticularly to credit policies and interest rates which olways need time to take effect.

Great uncertainty overshodows the road-building sector of the industry thia year. The road-building programme has fallen so far behind what hea been planned and what is required that thousands of milliona of Marks are required to make up the lost ground.

To keep up with the increased numbers of cars that are being put on the roads over 400 thousand million Marks would be needed at today's prices. The price index for road-building which was always under 100 from 1962 to 1969 will touch 120 this year.

This increase cannot in the long run be covered by increased productivity. The building trade is, moreover, forced to complete long-standing contracts at fixed pricea in the face of vastly increased

Apart from wages meterial costs have also risen, the central association com-

(Frankfurter Rundschau, 5 January 1971)

### When managers of large Japanese industrial and commercial com-Competition from Tokyo in Russian markets hurts

In the Kremlin there are many coolheaded, calculating people. Lately they Items on the agenda included building have been looking towards this country and trends in prices here.

There was great disappointment on gas and special types of wood to Japan both sides at the International Machine-Tools Fair in September.

and of course money matters, credit and Soviet technicians and buyers were of Shortly afterwerds the Soviet news the opinion that Federal Republe inagency Tass reported that deals worth dustry could supply materials and parts about 700 million dollars were forecast for the Kama lorry-works project and for 1970. This must have been a disother ventures plenned for the next fcw

appointment for the optimists since the trade agreement of March 1969 had This was backed up by experience on the vehicle manufacturing plant at Togliattigrad on the Volga.

But It was this very car factory that put the wind up several firms in the Federal Republic. Firms in this country agreed to make deliverles to Togliattigrad worth 450 million Marks.

The pricea they set then were affected by a recession and were at a steady low. No one imagined that two or three years later costs would run wild and overtake the prices then agreed upon.

The fact is thet many of the firms involved have been brought to the brink of disester by this deal. Today the bosses of firms in this

country are trying to show themselves smarter. They have tried to get contracts with adjustable price levels, but the Russians have refused point blank to heve

And so the result is that there are fixed

surcharges on prices. This in turn has hi to offers being made that have convince the Russlans that this country is not? that interested in trading with the

other countries."

But of course the Japanese are periencing galloping prico rises as sell-Howover, industrial Japan with 18 hr monlous economic and company page has other opportunities of conquest markets that appear important.

The Ministry for International Time and Industry in Tokyo makes no boad about this fact. This is quite understand able when it is considered that Japan a only provide about one fifth of its one. fuel and power requirements.

There is another good reason for Japan's industry to try to get on good terms with the Russians. The Japanes cannot any longer find extensive outlet for the capital investment goods the produce in Europe and the emerging countries ere not really yet to but sufficient hoavy industrial Japan to keep the economy ticking out

The Union of Soviet Sucialist Republis is now just ready for these items. Our industry is, however, viewing the situation with nonchalance. We know that the atmosphere cannot yet have been completely cleared by the treaties signs with Socialist countries and the Mosco?

Treaty's effect on Bonn-Moscow relation is not yet being felt to the full. Nevertheless the criterion the Russians use in trading is the price and supply potential of their products. Their heads also forced by the fact that enedit facilities cannot be extended indefinitely. Experta reckon that Moscow has already had one thousand million dollars on loan from the West. (DIE ZEIT, 1 January 1970)

the building trade have announced that they will be showing in Essen decisive members of a new consum changes for the next few years. By taking in the foresceable future. advantage of all the available opportunities for rationalisation it is possible to make economics of up to thirty per cent, sccording to the director of the institute for building research in Hanover, Pro-fessor Triebel.

Constructing the new housing design will take little longer than one shift. No crane will be needed. All the workers will have to do is lift the light-weight building elements into their right position which has been carefully marked by a plan of

## More consumer protection planned

Regular subscribers to the consumer magazine Test are likely to become members of a new consumers' association

The Economic Affairs Ministry is considering making subscribers to the magazine eligible for membership of the powerful and active consumer organisa-

Test, a monthly publication is produced by the Berlin-based Stiftung Warentest organisation that was set up by the government five years ago to control the quality of consumer products.

Of the 140,000 readers of the magazine 70,000 are regular subacribers and the circulation last year went up on average by 2,000 each month.

The "Test-Plan" is among the meesures which the Economic Affairs Ministry intends to introduce to protect the consumer against the might of large corpora-

The sbort-term aim of the Ministry before the foundation of the "Test Federation" is to atrengthen the Working Committee of Consumer Associations (AGV), basad in Bonn, which was set up as long ago aa 1953.

(Frankfurier Rundschau, 6 January 1971)

## Emil Schuh's design team gives the railways a new look

orce out the grey is a slogan that is no longer limited to detergent admen. It ia the task facing e body set up by Deutsche Bundesbahn, the German Federel Ratiweys, about a year ago, the design centre in Munich.

Many fixed ideas as to how compartmenta must be designed, upholstery shapcd, stationa fitted out end neme plates fixed date back to a grey twilight in the distent past, oo it were.

"This," says chici designer Emil Schuh, 64, a senior director at the Bundeabehn's Munich officea, "is why we are taking o look at everything - from tickets to gas turbine locomotives."

From the passenger's point of view the most obvious cliangea the dealgn cantre will soon have brought ebout will be in

The derk green of most carriages, dating from the nineteenth century, is to give way to brighter, more cheerful colours that are more in line with the testes of the younger generation.

Three new look long-distence treins alreedy travel to and fre on reguler scrvices. The besic carriage colour is silver-grey au perimposed with other colours for the window framea, flesies

Orenge is the distinctive colour of first-class carriages, blue that of second-class, red for buffet and sleeper cars, like for couchattes and green for luggage cers.

In a few yeers' time completely naw corrieges will add a new look to Bundesbahn rolling atock. They will retain the new colours but the silver-gray base will be replaced by the silver gleam of rustproof steel.

In order to make the superatructure es light in weight as possible the aldes of the carriages will not be atraight up end down; there will be folds in them, es it were. Ae for the rustproof steel, it promises to need no mnintenence et all, permenent wey, as saving both labour materials end weer As e result there can be no alternations

The new cerriages are to be unveiled next year. The Bundesbehn board has only recently decided between two fully size prototypes modelled by the design centre end so given the go-ahead for the interior decor.

The most important change is thet second-class carriages are now also to be alr-conditioned. Cerriages will be six inches wider end the upholatery is to be febric rather than leether.

As is alreedy Bundesbahn practica, unlike that of railway euthorities in a good many other countries, the new second-class oarriages are to have only three agets per width of compertment.

The gaily-patterned fabric-covered seata will be reclinable and the upholstered armreats will continue to be folded up and beck into the body of the seat when not needed.

The walls will be in balge plastic and other changes that reveel the designers' work are new luggage racks, new reeding lamps over every seat and windows 1,20 matres (four feet) wide.

Only corridor windows will be openable. On the compartment side they will be in one piece aince ventiletion end heating will be handled by the air

conditioning.

First-class trevel, particularly in The Bundesbahn's Rheingold class Transing firms in Hamburg, Northarn Lower

Europe-Express cerriages, is already a hallmark of camfort but the design centre is working on further improvements.

The seets are to be better designed end corung, heedrests to be softer and edjustable, lighting to be improved. Toilets ere to be better designed end boerding end disembarking faciliteted by an edditional folding step below the doors (the floor level of Continental corriages is well above that of platforms).

Another pet project of the Bundesbehn design team is the two new party carriages that will mainly form pert of special treins end be hired to trevel agents. They are to include one large room that cen be subdivided, e bar, e kitclien, e room for couriers and Trans-Europ-Express standard toilets.

There ere also plans for e conference room that can be used as e projection room for slides end filma.

The designera ettach particular importance to the appearence of new locomotives end railcars. Although cerriegea and compartments are of fer more immediate importance for the passenger there is greater general interest in the locomotives, which are et times viewed as the hallmark of the respective railway

Cluef designer Emil Schuh, who is both en engineer end an architect, has been en edviser on locometive design to the Bundesbahn boord since 1955.

In many cases the Trans-Europe-Express diesel railcar is still hailed es a superb design even though it hes been superseded es the atar of the Bundeabehn sheda by the 125-nula-an-hour 103 class electric locomotive, a long run of which ia now under construction.

The 216 range of diesel locomotivea, including the 215, 217, 218, 219 and 220 versions, is enother class that has proved moat aatisfectory in design.

Experienced architect Schuh mekee no bones about locomotive design prasenting designers with meny a tough nut to creck.
There is notiling thet can be dona ebout
the basic problem, which is that dimenalona are predetermined by gauge end

little varietion in length. So epart from the colour the mein design feeture can only be the front and, the fece of the

Here too there ere any number of factors that must be taken into account. Design must be atreomlined to reduce wind reeislance. The driver's vision must be unhindered end the design must not clash with that of the rolling stock.

The ET 403 electric railcer, schaduled

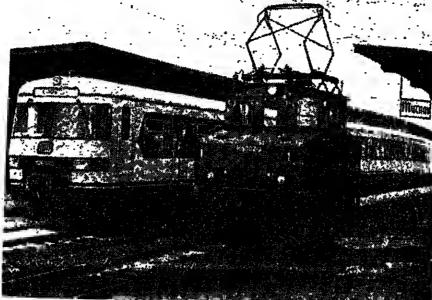

Bundeabahn expresses, using 103 class locomotives, will soon be thundering

Ita front end beers an unmistekeable

esemblance to a fish and is undoubtedly streemlined. It is already as good es certein that the VT 603 ges turbine railcar will have roughly the seme look.
The only odditional design problem

presented by the gas turbine rallcar is that the carriages will be in between the two locomotive unita, each equipped with two ,500-horse-power ges turbinea.

The roof of the power units must accordingly be rounded so as to make them mutch tire carriages. Director Schuh sees what he chooses to

call environment as another focel point of design work. By this he means everything that serves to inform, hendle end guida

The Bundasbahn design cantra intands to keep en attentive and critical eye on everything connected with signposting, illumination, information, communicetion, inter-reletion of the verious service fecilities and atation deeign, including elevetors, escelatore and trevelletors.

Thia, of course, will be in eddition to the besic design of new trevaller facilities, the emphesis being on usefulnaca to

Environment will thus be one of the most importent items on the egende of the international RIDE 71 conference, a ongresa to ba hold in Nuremberg this Mey that will be ettended by dasign staff who tao ever to width and height end very of nearly ell Europeen railway euthori-

They will be peying perticular ettantion the information and processing of trevellera according to uniform European atanderds, also to tricky items auch as the handling of cripples end the construction of ramps es en alternetive to stepe so es to make it easier to move prams, luggage portern end the like from one level to

Last but not leest they will be dealing

eround more easily. Emil Schuh's design team at thei

ment includes three engineering grade. specialising in architecture, two engin ing graduates specialising in mechanic engineering, three industrial design two commercial artists and a model-but

They can also call on the services of , psychologist, not to say a total stalle t 400,000, for the entire Bundesbahne its facilities are at their disposal.

This fact is no less important than't direct link Emil Schuli hes with t Bundesbahn board in Frankfurt.

Raif Roman Rossberg (Handelabiati, 30 December 19

## Inter-city expresses, to start this autumn

I nicr-city services are to he inaugunts by the Bundesbahn this autumn. The will, according to the limitesbalm's !! nich offices, ha first-class services 1 roughly two-hourly intervals linking me cities all over the country.

It is further stated that the number services to end from South-East Eurogi to be increesed this year. There will it be en additional dally service betake Dortmund und Innsbruck, continuig to Bolzeno, South Tyrol, on Seturdays.

A new car sleeper service bely Munich and Norbonna will consideral feellitete travel to and from this count and the South of France end Spain.

It will leeve Munich East at 16.12hou end arrive at Narbonne et fiva to nine !! next morning end Iceves Nerbonne 17.40 hours, arriving back in Munich (WELT am SONNTAG, 3 January 1917

## Wild cats in the back garden

## Münchner Merkur

miling apologetically Walter Scheffel, a 46-year-old tax adviser said: "Wall, others schoolset stamps." Behind his buogalow in Bischofsheim, near Frankfurt, Mr Schefici has the largest, private park for wild animals in Europa.

Mr Scheffel had o famous ancastor, the Romantic poet Viktor von Scheffel (ig26-1gg6) who was fond of cats. Walter Scheffel is also a cat fan but he does not confine himself to the little furry, purring creatures. He has four tigers and 41 other wild ests. Every zeo in the world envies him this collection, for Waltar Scheffel, his wife lnge and 22-year-old son Viktor breed only thoroughbred animals.

In zoological gardens including Professor Grzunek's Frankfurt collection there are only hybrid tigers, panthers and le opards.

Zoo directors and animal behaviour scientists look upon the private zoo in Bischofsheim with its heatad cages as the Mecca of wild animal breeding.

The Scheffels do not breed lions. Thay say: "The king of the animals is too common for us to bother with."

Their house in Löwenseestrasse, a name that just by chance is reminiscent of lions, might well be situated somewhere in Africa, the property of a well-to-do farmer from the point of view of its architecture, the decorative pisnts that grow there, the Italien columns and the palm trees that surround it.

However, Walter Scheffel was bom in the nearby township of Dornighelm on the Main. He has never seen Africa or the wide world.

In fact he has not had a holiday for years. He spenda his whole time from morn till night and at the weekend when his assistant Werner Thiel, 34, is free, looking after the big cats.

"When I was a boy I grew fond of cats. We nlways had one in the house," he says stroking the Siberlan tiger, Rejsh, born on 6 February 1968 et Moscow Zoo. Rajeh likes to be stroked, murmurs like a little pussy, rolls over on the floor, licks Mr Scheffel's hand end playfully seizes

This idyllic picture is misleeding. The animal weighs close on 800 pounds and its full height is just over eleven feat.

Rajah would tear a stranger to bits. When e friend clapped Walter Scheffal on the shoulder in e friendly manner the tiger went wild, thinking its master was being attacked. That same friend can still not epprach the tiger cage without setting Rejah wild even through the incident happened over a year ago.

Mr Scheffel says he keeps his cats for the sheer pleasure of doing so. He does not believe in trading animals apart from occasionally sending a cub to a zoo.

He has to dig deep into his pocket for new acquisitions. Animal trappers in Asia, Africa and South America know that money is no object when Mr Scheffel wants a prize specimen.

Species of wild cats that are on the verge of dying out have been sent to the Scheffel home in preference to famous

Walter Schaffal with his Sumatran tigar

(Photo: Herbert Mehrens)

specimen of Sumatran tiger, Bengal tigar, Siberlan tiger, baikai lynx, South-West African hunting leopard, North China leopard (a pair of these cost £8,000) panthers, jaguara, pumas and larga cats from Pakistan and Vietnam.

No zoo in the East or West can match Mr Scheffel's success in acquiring rare species and in successful breeding.

Sinca he took up his hobby in 1955 ha has managed to breed types of animals that in some cases have only bred elsewhere in captivity twice or even once.

Apart from the Scheffel family those who are sdmitted to the private zoo are prominent zoologists such as Professor Grzimek, or the famous scientist who has specialised in large cats, Professor Lay-hausen from the Max Planck Institute for Behavioural Research in Wuppartal. He is interested in the only examples of Amur cats in captivity. These animals live along the rivers Amur and Ussuri on the Russian-Chinese border.

Every morning at six Mr Scheffel is in the animal house. He has two hours of hard work ahead of hlm. Cages have to be cleaned, and cats have to ba fed. Viktor and Mr Thiel are his assistants. Then Mr Scheffel goes to the tax office. In the evening when the ests have been fed and settle down to sleep Mr Scheffel does his studying. Cats, of course!

He is so knowledgeable about the falina species that no one outdoes him where

cats are concerned. He swells with pride whan Professor Grzimek makes a comment such as "Your Mexicao jaguar is the floest specimen I have ever seen."

This jaguar, called Dicker Is on very good terms with his cage-mate the Chinese leopard Mau-Mau. In a nearby cage the Sumatran tiger Khan comes at Mr Scheffel's beck and call to the bars of its cage as obediently as a police dog. He speaks quietly to his cats. Training with whip and stool plays no part.

Mr Scheffel's hobby is expensive and time consuming. The cost of the cages, for instance, is high enough. "i cannot think of anything that I would rather devote myself to," Mr Scheffel sold.

What the outsider might regard as the biggest problem, fodder, is the least worry. A fully grown tiger eats no more than a large dog. In the wild e starving tiger that lias finally made a kill can get through 150 pounds of meat at one go. But when regulerly foddared it wants only small portions. Mr Scheffel is a regular customer at the Frankfurt slaughterhouse. He fetches meat from there twice

The neighbours do not mind. The Scheffel cats are kept clean so there is no smell and since Mr Scheffel does not fancy himself as a trainar they do not roar. They make less noise, in fact, than Mr Scheffel's two pet parrots and owls.

ice skating in this country is on what are in many cases attractive but none too successful legs. Even so, the girls show more promise if anything. The men are in e bad way indeed.

Klaua Grimmelt will no doubt becoma national champion again but on the international scena he is decidedly an

'Grimmelt is a fine sportsman who is well aware of his own limitations," says Zeller. "He will be among the first ten nelther at Zürich nor at Lyons. Promising youngsters there are but they will not stand e chance until 1976."

Erich Zeller is one of the few prominent coaches in this country. He took Marike Kliius and Hans-Jürgen Bäumler to the top, introduced Almit Lehmann and Flerbert Wiesinger ("Almut has tremendous personality.") and is at present preparing a thirteen-year-old girl, Gundi Niessen, for what definitely promises to be a great future.

In Moscow, at this season's first major comparison of standards, the young Disseldorf girl came third. Is she a glowing hope for Sapporo?

"Too early," — Zeller. "Sho is a gleam of light," — Geiger. "One of the strokes of luck I was talking about," - Schnelidorfar.

What are Almut Leiunann and Herbert Wiesinger's medal prospects?

"Nil really, unless that is one of the Russlan pairs stumble," says Zeller. "I am come from the south of the country." bound to say that the .........

simply lictter." Is there a shurtage of gnud trainers in this country? "There can be un doubt that this Is one of our prohcomments Fritz Geiger, "Finding good cuaches is every blt as difficult us discovering gehave just held our

first refresher course for trainors with the emphasis on the latest in training ma-thods. We have high hopes of results. Education theory can be been at learnt and ice-skating Transport coaches must abova all be good teachers." "Yes we are short of good trainers," seys Erich Zeller. "We need experts who are Gundi Niessen, this country's great lcesketing hops, with

good teachers too. It is decidedly not enough for someone to have been a good skatar at some stage. He need not necessarily automatically be a good coach.

"A trainer must alweys be an educationalist too. We increasingly have to deal with young paopie, children even, in ice skating."

"I don't think that the ice-skating problem here is first and foremost trainer problem," notes Manfred Schnelldorfer. "Mind you, I do feel it is a decided handicap that the few really good coaclies are all to ba found at the few

really good rinks.
"This is why one always gets the impression that all promising ice skaters

is ice skating in the Federal Republic in financial trouble?

"To a certain extent yes," says Erich Zelier. "The talents that como to me in Garmisch need to have money. If talented youngsters in Hamburg had the facilities there it would certainly be less expensive

"I'll say it's e question of money," says Manfred Schneildorfer. "Parents need to spend about thirty Marks a doy if they want their youngster to be trained by a really good coach sway from home.

"What is more, I reckon that the money is badly distributed from above. In this country the powers that be still behave as though all skaters were noble omateurs. Yet there is not even a youngster in competitive sport today who does not know how to cash in on his sport."

"A question of money?" asks Fritz Gelgsr. "No. Not that we ever have enough of it, of courso but it would be too easy to attribute everything to a shortage of cash."

So there it is. There are no prospects uf a medal for either the women or the men at Sapporo and Lehmann and Wlesinger stand an outside chance at this year's European and world championships.

"But we are not resigning ourselves to the fset," says Fritz Geiger. lee skuting promises to do better. Gerhard Seehase (WELT am SONNTAG, 3 Jonuary 1971)

## Olympic spectators

The Olympic facilities at Oberwiesen-feld, Munich, accommodete exactly 102,371 spectetors, eccording to tha company that will be responsible for meintaining them after the 1972 Olympics and es far as possible financing their upkeep out of the proceeds of sporting

The Olympic stedium holds \$1,370 spectators. Accommodation in the covered hall varies eccording to the use to which it is put. 14,267 spectators can wetch boxing contests, 10,399 six-de cycling races and 10,230 Indoor handball and ice hockay this WELT.30December (970)

ieter Ferell, who is an animal trainer at present working with the Krone Circus owns the largest collection of species of wild animal in the world and is at the same time one of the youngest tamers under the world's big-tops. His daily work now includes an extra labour of love. He is acting ss mother to

three tiger cubs who came into this world on Christmas Eve. He feeds and tends the little ones and

Their mother Tosca could not care a tin Parell was trying to persuade the mother to suckle the cubs, but in voln.

Tosca lay in a comer of her cage and finally got so fed up with Mr Farell's efforts to make her feed her young that she made it clear sha would gobble tham up if they were put by her again, Mr Parell gave up in disgust.

There was nothing left to do but get a Among the enimals in the Scheffel trainer now says that they are out of the baby'a bottle and make them a feed. collection he proudly claims at least one woods. But he cannot keep them,

Big cats and the big-top are Dieter Farell's career

For Mr Farell who comes from the East Zone there has only been one profession since ha saw a circus film at the age of eight, 28 years ago. He has always wanted they are expressing their thanks to him by flourishing end growing strong

His career started at the bottom, of cat's meat about her offapring! All he was only there six months before he made the leap into the big time. He got e transfer to the famous Sarassanl Circus. He graduated from lions to tigers. He

bought black panthers end pumas. You name it, end if it is a big cat Dioter Farell has trained it at some time in his career. But his favourites are tigars. "They are elegant creatures and they pick things up quickly." He is not so keen on lions. He

thinks they are idle and do not merit their title, king of the animals. However, they can be woken into ectivity as Mr Farell discovered to his cost four years ego. In the middle of his act

Referee Farell stepped in and the man decided to make a meal of his cless seeing this swing in the balance of post the other llons took it as a signal for the to join in the act. They set upon the country it is more good luck than good management. Think, for instance, of Almut Lehmann and Herbert Wiesinger. There can be no comparison with the

the ring with the same bunch of animibut he performed his set amid great put he claims never to have been frights ed by his enimals.

"They know I'm the boss and showed the slightest sign of fear it. would amuse themselves et my experience of fiesh. I never hit them. I just in them with my whip and the whole time talk to them." Circusgoera realise just how soft-hand

the tamer is with his lions and tigers. The big sttrection of his act is tigress Prinzess, who walks on her him legs. It took eight months to frain her as the whip was oever used once.

Susanne Klaulehi (Münchner Merkur, 2 January 1911)
